

PEDDINA ABHINASH

Frontend Developer | React.js | TypeScript

+91 6305865365 peddinaabhinash999@gmail.com linkedin.com/in/peddinaabhinash
github.com/peddinaabhinash999 Srikakulam, India

SUMMARY

Frontend Developer with 1.5 years of experience building scalable, responsive, and user-friendly web applications using React.js, TypeScript, and Next.js. Experienced in developing reusable component architectures, integrating REST and GraphQL APIs, implementing JWT authentication, and deploying applications using Docker, Vercel, Netlify, and Google Cloud Run. Skilled in performance optimization, SEO, responsive design, and collaborating with cross-functional teams to deliver secure, high-quality, and production-ready web applications

EXPERIENCE

Frontend Developer

Citimedia Global Solutions

05/2025 - Present

- Improved UI responsiveness by 30% by optimizing React.js and TypeScript frontend rendering workflows across internal applications, ensuring design choices prioritize user experience
- Reduced frontend development time by 20% by engineering 15+ reusable UI components using Tailwind CSS, Material UI, and Shadcn UI to maintain brand consistency
- Integrated 8+ REST and GraphQL APIs across 2 internal products, collaborating with back-end developers to improve frontend data consistency by 40%
- Partnered with graphic designers and QA teams in Agile sprint cycles to deliver production-ready frontend features that balance functional and aesthetic design
- Improved deployment consistency and application scalability using Docker, Google Cloud Run, and CI/CD workflow practices
- Enhanced responsive behavior and accessibility standards using WCAG-friendly practices to optimize web pages for smartphones and desktop devices
- Utilized SEO principles and optimized frontend build workflows in Vite-based React applications to improve application performance and search visibility

Frontend Developer Intern

Citimedia Global Solutions

11/2024 - 04/2025

- Assisted in building responsive frontend interfaces using React.js, TypeScript, and Tailwind CSS, focusing on key design principles and user experience
- Built 8+ reusable UI components and integrated REST APIs to improve frontend consistency and application stability across web pages
- Participated in debugging, UI testing, and Agile sprint discussions, ensuring alignment between web design and server-side requirements

SKILLS

Frameworks & Libraries

React.js

Next.js basics (Routing, SSR, API integration)

React Router

Redux

Tailwind CSS

Material UI

Shadcn UI

D3.js

APIs & Authentication

REST API integration

GraphQL (Apollo/queries)

Axios

Fetch API

JWT Authentication

Tools & Deployment

Git

GitHub

Docker

Vercel

Netlify

Google Cloud Run

Vite

Webpack

Postman

VS Code

Adobe Illustrator

Cloud & CI/CD

GitHub Actions

CI/CD Basics

PROJECTS

BrainFx

- Developed interactive healthcare dashboards and cognitive workflow interfaces using reusable React.js components, striking a balance between functional and aesthetic design
- Integrated REST APIs for patient data synchronization and optimized responsive UI rendering across smartphones and tablets
- Delivered scalable assessment workflow modules for internal healthcare testing environments, reducing duplicate component development effort

EDUCATION

MCA

BVC College of Engineering

📅 2022 - 2024

- Relevant Coursework: Computer Science, Web Technologies, Data Structures, Database Management Systems
-

B.Sc. Computers

SK Degree College

📅 2019 - 2022

PROJECTS

RecruiterAI

- Developed AI interview dashboards and candidate workflows, ensuring user experience requirements determined all design choices
 - Integrated GraphQL APIs and video-based components to support real-time interview experiences while maintaining brand consistency
 - Improved frontend scalability and user experience through reusable component architecture and responsive UI optimization
-

Interactive Learning Activities

- Built interactive assessment workflows and games using React.js, utilizing a variety of markup languages to ensure cross-browser compatibility
- Implemented touch support and drag-and-drop interactions for mobile and desktop learning experiences, optimizing for maximum speed and efficiency
- Developed reusable learning activity structures with progress tracking and optimized UI behavior for improved user engagement
